

HotDocs Document Services

Take the world's leading document assembly technology to the cloud

HotDocs Document Services is a Software as a Service (SaaS) application that quickly gets you up and running with your own personalised web portal for accessing HotDocs templates and generating documents online. Your *HotDocs Document Services* site can easily scale and adapt to meet your changing needs and help to reduce costs, save time and work on your documents wherever you are.

Create new or use existing HotDocs templates that enable you to quickly gather data and generate client specific, error-free versions of a document or suite of documents.

Upload your automated HotDocs templates to your custom *Document Services* web portal to conveniently access and organise your templates and documents online anytime, anywhere.

Send links to questionnaires directly to clients or embed them in any web page, enabling your clients to conveniently and securely enter their own information at any time and from anywhere.

First Name

Megan

Last Name

Gardner

Save answers in Answer Files that can be used to automatically populate questionnaires for related documents. Users can complete questionnaires in real time, or data can be imported from previous documents or answer files, as well as from other applications.

Create user groups and group permissions for added security and control.

Hosted on Microsoft Azure, *HotDocs Document Services* has a secure cloud infrastructure and backup capabilities for all your templates and documents.
