# Why HotDocs?

HotDocs is the most established and sophisticated document assembly solution available.

The HotDocs team were pioneers of document assembly in the late 1980s and early 1990s, taking what started as a university research project and bringing it successfully to market.

Fast forward almost twenty five years and HotDocs is the market leader, worldwide, in document automation technology. All those years of experience of working with clients across multiple industries has enabled HotDocs to routinely apply real life customer feedback to product development; a practice that has contributed to HotDocs' position as the most powerful and functional document assembly software around.

Award-Winning Technology

HotDocs' efforts have been rewarded with a range of awards for technology and business growth, including recognition by leading industry analyst Gartner as a Cool Vendor and Best of Breed technology in the Enterprise Content Management (ECM) space.
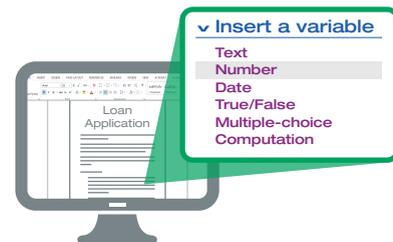

Return on Investment

Almost every organisation, large or small, creates documentation and invests time and resources to make sure that these are accurate and deliver what is needed for the business. What are the benefits of automating this process using HotDocs?

▶ Reduced Risk – human error is minimised, decreasing the opportunity for costly mistakes within documents
▶ Enhanced Compliance – internal and external rules and regulations can be built in to ensure compliance
▶ Operational Efficiencies – time and money savings are an immediate advantage of using HotDocs
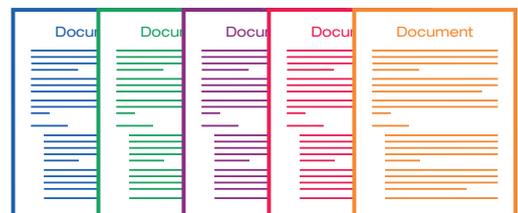

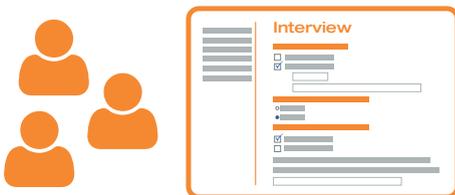

Reap the Benefits

The process of turning frequently used documents into dynamic HotDocs templates is straightforward:

1. Take any document, form or set of documents used in your organisation

2. Use the HotDocs authoring tool to convert into a dynamic template

3. For each new document, enter data either via an intelligent HotDocs interview or automatically through integration with another business data source

4. HotDocs assembles the finished, perfectly formatted document in seconds

Once time has been invested in transforming documents into dynamic templates, HotDocs brings immediate ROI by saving time and money, increasing accuracy and improving output rate. All answer data from a HotDocs interview can be re-used multiple times for subsequent documents.
